

PERFECT PROCESS CONTROL, FAST COLOUR CHANGE, EASY TO USE.

# 2K-UniMix II ECO

## Inexpensive electronic mixing- and dosing equipment

### Areas of application

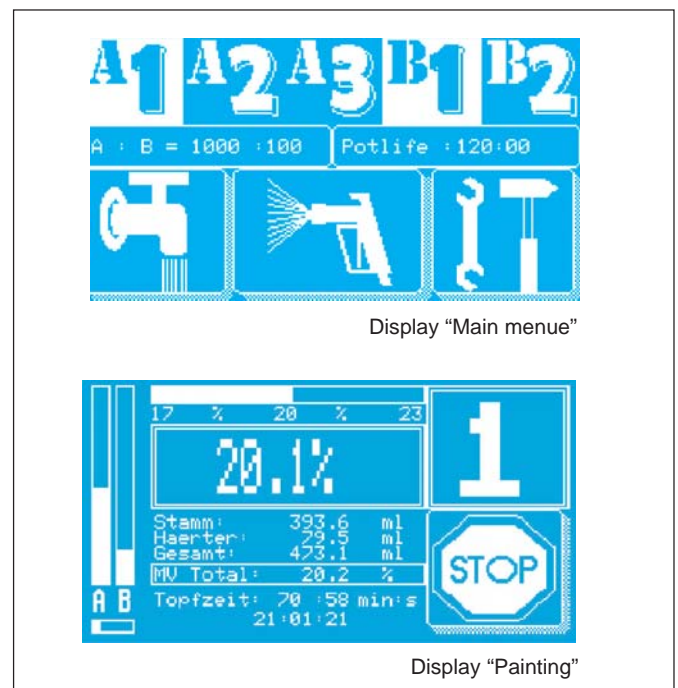

- Plastic coating, furniture-, window- and door production
- Machine- and equipment production, leather industry
- Automobile industry
- Agricultural machines

### Features

- Complete handling over touch screen
- All functions in clear icon display
- Only options and control panels that are needed are visible
- Easy and accurate handling without prior knowledge
- 4 control panels are enough for daily use: choose components, specify mixture ration, spraying, rinsing

The 2K-Unimix II ECO system offers a reasonable step into the area of electronic dosing for the money conscious user without the risk of compromise in regard of precision, handling and service.

Materials are selected and the mixture ration and pot life are specified with simple touch screen inputs. Complete colour changes are executed in less than a minute depending on the components connected.

PERFECT PROCESS CONTROL, FAST COLOUR CHANGE, EASY TO USE.

## Technical Data

### 2K-UniMix II ECO

Amount of paint:	1 to 3
Amount of hardener:	1 to 2
Mixture ration:	0,0% - 200% (in 0,1 % steps)
Working pressure:	0 to 250 bar
Precision:	better than 1% relative repeatability
Flow quantity:	50 to 3000 ml/min
Connection:	parallel interface printer, optional RS232 with PC communication software
Options:	fluid part EEx-protected gauge head with ball bearings for hydrosoft paint air/solvent rinsing 3K outfit remote control (start/stop/rinse)
