

INCREASED EFFICIENCY AND QUALITY THROUGH TRAINING.

# Training

## Customer specific training with FANUC painting robots

### Training course objectives

This training is focused on the requirements of the customer. Topics and time frames will be specified accordingly before the beginning of the training.

### Possible training topics

- The painting process and FANUC painting robots
- Handling of different paint application procedures
- Developing and documenting of painting programs for brought along work pieces
- Optimization of painting programs
- Electrostatic application
- 2K and 3K dosing technique
- Robot-, high rotation-, discomat- and air atomizing installations
- Paint supply and water based paint
- Other topics as agreed on

### Target group

This training does not require prior special knowledge because it is based on the requirements and experience of the participants.

### Optional training day

Subsequent to the training we offer the possibility to book an optional training day – with your own work pieces – in our painting installation.

**Duration of Course:** 1 - 2 days

**Number of Participants:** per arrangement
